Certified
24/7 Support

PC & MAC Service

415digital has over 25 years of professional IT experience supporting Mac & PC computers. Our services range from removing virus's, spyware, installing new hardware, upgrading systems, installing new systems, to just cleaning up and optimizing your current system.

Let 415digital work with you on all your computer problems.

Networking

If you currently have a network in your home or business we offer services to provide support for it. If you do not have a network but are looking at the possibility of getting one setup we would be glad to go over the available options..

Online Backups

Losing data is something that most people do not think about until it 's too late. It can be important documents to pictures of the family. Nobody wants to wake up and find out that their files on their computer are no longer there. With 415digital we provide online backups that take the worry away. Each and every day your files are backed up to a remote location "secured" and you can rest easy knowing your data is secure.

. Visit our website for more information www.415digital.com

Online Remote Support

Did you know that 97% of all personal computer issues and malfunctions are related to software? What this means to you is that 415digital technicians can remote into your Mac or PC computer without the need for an on-site It's all virtual and remote..

When we perform service on your computer, you will be able to watch and observe all repair work, live ! Yes, you will be able to see our work, as we do it. Each remote repair session will last any where from 30 minutes to sometimes 2 hours, depending on the complexity of the issue. You have full control of your system at all times and connection is safe & secure.

If you have any questions about our service or how we work, please feel free to call 866-611-8734

Training

Whether you're new to the computer, returning for review, or want to use technology to enhance your skills.
